Note:

Percentage at the top of each column is the salary increase given from current salary for a lane movement; the teacher is then placed at the next highest step in new column.

Teachers eligible to move more than one lane can move one column per year for two years (with column percentage increases each year and placement at next highest step) or can move directly to the highest column for which they are eligible and receive the percentage increase (with placement at the next highest step) for that column only; whichever is more beneficial to teacher.
